

Voix-920USB Binaural Noise Cancelling Headset

Voix-920 Binaural headset is more effective in filtering and isolating ambient noise. Using the latest noise reduction technology the combination of directional microphone head and anti-static microphone arm makes the speech clear and pleasing to the ear, which greatly improves the voice quality. The design is beautiful and generous, and the material and structure of the reinforced design not only make

Headset headlines can be telescopic up and down to adapt to head size

Product Features

Clear Call . Strong Reducing Ability

With broadband noise reduction ability, it can easily restore the call effect and keep the sound quality clearer

Protein Leather Cover is Soft and Comfortable and Breathable

Protein Leather Cover is Soft and Comfortable and Breathable;
Artificial protein leather cover, soft, comfortable and breathable, avoid allergy

TECHNICAL PARAMETERS

Headset

Moving coil type neodymium iron shed magnetic horn

Outside Dimension: $\Phi 28\text{mm}$

Frequency Response: $150\text{HZ} \sim 4.5\text{KHZ}$

Sensitivity: $113 \pm 3\text{dB}$ (at $1\text{KHz} 1\text{mw}$)

Impedance: $150 \Omega \pm 5\%$

Degree of Distortion: $< 1\%$

Rated Input Power: 30mW

Maximum Allowable Power: 50mW

Microphone

Directivity: single pointing
size: $\Phi 6 \times 2.7\text{mm}$

Frequency Range: $50\text{HZ} \sim 3.0\text{KHZ}$

Sensitivity: $-44 \pm 3\text{dB}$

Impedance: 2.2K

Working Voltage: 3.0V

Electric Current: $100\mu\text{A} \sim 400\mu\text{A}$

Withstand Voltage Range: $1.0 \sim 10.0\text{V}$

The frequency response curve is designed between $300\text{HZ} \sim 6.8\text{KHZ}$, and the sound is full and soft without distortion

Note: the frequency response curve is measured at room temperature of 25°C , relative humidity at 70% and 1 atmosphere pressure.
